

LACASADEI NUMERI

The worksheet is designed for children to practice writing house numbers. It features a large house-shaped outline. The roof is a triangle containing the title 'LACASADEI NUMERI'. The main body of the house is a rectangle divided into three horizontal sections by dashed lines. The top two sections each contain three rectangular windows, and the bottom section contains two windows flanking a central door. Each window and the door are divided into four horizontal lines by dashed lines, providing a guide for writing the digits of a number.
